

STATEMENT REGARDING PROPOSED STRIKE.

Out of consideration of the critical situation facing our city and community, socially and economically, we sincerely believe that industrial action such as strike action in all our places of work can only have harmful results to our future chances of progress and job opportunities.

We would therefore most seriously call on all workers who may find themselves faced with a proposal to withdraw their labour tomorrow to refrain from such actions as not being in the best interests of this city and its people.
